

Dear Donor,

As we prepare to celebrate 15 years this year, it's been amazing to reflect back on all that God has done through you, our donors, to bring us to where we are today!

From owning our own building, to expanding staff and services and more - who could have imagined when Abiding Care opened that 15 years later this is where we would be!

We also could not have imagined the battle for life that would ensue either.

*Roe finally falling -
Attacks on pregnancy centers -
A storm of misinformation and censorship -
Legislation attacks -
Unprecedented access to the abortion pill -*

It's been a wild ride of navigating the mountain tops and valleys.

*But God is moving.
Lives are being saved and transformed.
It's important to know that we receive no government funding or large endowments. **It is solely through faithful givers like you!***

*But through you
God is doing immeasurably more than all we ask or imagine! (Eph 3:20)*

*All glory to Him
and our greatest thanks to you!*

Thank You!

2025 Goals Completed

Here are a few goals by God's grace and your help that we were able to meet:

- Major construction inside and out completed!
- New ultrasound machine here!
- New Dr of Radiology on board
- A new director of Family Support
- All of our bills are paid!

Sneak Peek for 2026

- Focus on staffing, volunteer recruitment and staff development
- Create more visibility in the community
- Continue to strategize how to practically come alongside women more through our resources and community partnerships
- Whatever else God has in store!

2025 Annual Report
Snapshot

Medical Services

Expect the unexpected has been the theme of 2025! You have helped us to come alongside women in some of their scariest and darkest times, *and now also their male partners.*

Our numbers this year are just up slightly from last year. Roughly 70 women were served this year on the medical side with our life affirming services. Of those 70, 45 filled out exit surveys - 100% of our clients indicated that they would refer this center to a friend.

Here are a couple of their comments:

"[appreciate]the positivity and encouragement during a stressful time."

"[appreciate]how unjudgemental it is here!"
"The lady (nurse) I was with was so supportive and helpful."

From coming alongside abortion-minded women to those who are miscarrying *and* women who can't get in to an OB right away, so many in our community are appreciative of this help being offered,

All provided free because of you!
May God help us come alongside more in 2026!!

Family Support Services

Build it and they will come!

With all the dads now coming along on the medical side, it's resulting in more couples signing up for parenting classes! Each year that number grows! Woo hoo!

We now also have a former clinical psychologist on staff who is seeing some of our tougher situations and will be overseeing and creating additional training for our volunteer parent educators - which we need more of! What a blessing to have!

We served 39 different parents throughout the year who availed themselves of almost 450 classes in 2025! They earned over 650 items - which equates to thousands of dollars of relief!

We are also seeing an increase in clients switching from parenting classes to discipleship classes!

We have given away more bibles this year than ever before!

What a gift to give a young and/or struggling parent a safe place to grow in their parenting and life skills and get much needed items and support. This is an impact that will affect generations. Thank you for making it possible!

Healthy U School Program

It's been so exciting to see this program continue to grow. Now that we have added Medford to our list of schools, we have received inquiries from other schools. It's been so exciting to be talking with students who live right here!

We also continue to do work with the Youth Diversion group that works with at risk teens. We get to bring them a message of hope and the power of starting over.

Here are just a few new things students liked and learned:

- how to stay physically and emotionally safe
- love vs infatuation
- how this unit will help future relationships
- the candy for answers, of course!

Here is what they would like to learn more on:

- *How to make relationships stronger*
- *What to do after baby comes*
- *How to end an unhealthy relationship*

Thank you for keeping this help for our young people alive and well!
